Professional Summary

Data Science Master's student with 5+ years of experience in software engineering and data analytics. Expert in building BI dashboards, performing complex data analysis, and automating data pipelines using Python, SQL, and Power BI. Proven track record in optimizing decision-making through data visualization. Seeking to apply Python and MATLAB development experience, GUI/HMI design, and CI/CD pipeline skills to support internal engineering tool development.

Professional Experience

06/2021 – 03/2026 Remote, USA	Software Engineer, Arbisoft Ltd. - Created an AI-driven meeting scheduling service integrated with Supercal.com algorithms, enhancing email-based meeting management and scheduling. - Established an automation testing pipeline for Edly.io, an OpenEdx-based product. This encompassed Django Python unit tests, Selenium-based frontend automation, stress testing with JMeter and Locust, and GitHub actions to execute tests per release. - Directed a team of 30 to develop a tailored CRM and customer portal for a Houston-based event management unicorn. This digital platform has not only streamlined operations but also saved the client \$400,000 annually by reducing reliance on SaaS tools. - Built and maintained internal tooling interfaces and dashboards to support team workflows, including GUI components for the CRM and customer portal platform.
06/2020 – 06/2021 Lahore, Pakistan	Senior Product Executive, Pakwheels.com - Conducted data reporting, ad-hoc analysis, and requirement-driven stakeholder analytics; built and maintained recurring reporting processes and KPI definitions for cross-functional teams. - Created dashboards on Microsoft Power BI to keep track of daily key metrics and digitized event-based tracking in Google Analytics and Hotjar Analytics. - Increased the daily listings by 600% and revenue by 250% in one year.

Education

10/2023 – 10/2027 Erlangen-Nürnberg, Germany	Friedrich-Alexander-Universität Erlangen-Nürnberg, Master of Science (M.Sc.) in Data Science Key Courses: Pattern Recognition, Pattern Analysis, Deep Learning, Computer Vision, Mathematics of Learning, Natural Language Processing, and Data Science Survival Skills
09/2016 – 05/2020 Lahore, Pakistan	Lahore University of Management Sciences (LUMS), Bachelors of Science (Hons.) in Computer Science Key Courses: Data Science, Machine Learning, Deep Learning, Data Mining, Computer Vision, Data Structures, Algorithms, Software Engineering, Human-Computer Interaction, Business Intelligence

Technical Skills

Analytics and Reporting SQL, Data validation and quality checks, KPI reporting, Power BI, Tableau, Google Data Studio, Google Analytics, Excel Power Query, ETL, Automated Data Pipelines.	Programming Python, MATLAB, Git, GitLab, GitHub Actions, Pipeline creation, Release deployment, Django, C, C++, C#, .NET, JavaScript, TypeScript, React, VUEJS, RLang, GoLang,	CRM & Project Management JIRA, Asana, MS Office Suite, Google Suite (Docs, Sheets, Presentations), Trello, Slack, MS Teams, SharePoint, Salesforce, Loom.	AI and LowCode Power Apps, Mendix, Claude Code, Cursor, Antigravity, Langchain, LlamaIndex, Figma

Projects

Supercal.com, A Meeting scheduling and enhancement system A meeting scheduling platform that allows for easy scheduling of meetings by finding the optimum times for every attendee based on their preference with its AI-powered algorithm. Deployed and managed through GitHub Actions.
Analytics on Google Scholar Profiles Developed, using MATLAB, automated data extraction and analysis pipelines, scraping and validating thousands of profiles to surface and correct data inconsistencies across more than half the dataset, then visualized trends to support faster decision-making.
Waltly.net, A 2D and 3D event diagramming tool A 2D and 3D diagramming tool created for a unicorn of event management businesses in USA. The webapp uses Python Django on the backend and React, HTML Canvas, and Three.js on the frontend.
Edly.io, OpenEdx based LMS and Studio creator An ed-tech platform based on OpenEdx that provides custom solutions to universities and businesses around the world. The platform provided its clients with a learning management system, a studio for creating ed-tech material and e-commerce for marketing purposes.
