TO WHOM IT MAY CONCERN

This is to certify that **Hamza Madni s/o Muhammad Ilyas** has worked with **Arbisoft Global LLC** from **October 17, 2023** till **March 16, 2026** as an **Independent Subcontractor**.

His designation history and key responsibilities are mentioned below as per our record:

Backend Engineer – Boston Venture Studio / Supercal.com

February 10, 2025 – March 13, 2026

Supercal Core:

- Developed scheduling and booking features, improving usability of user availability management, onboarding flows, and meeting settings.
- Optimized calendar analytics through advanced ORM query optimization, AWS SQS, and scalable backend design techniques.
- Implemented Zoom integration, enabling users to schedule and manage meetings directly through the Supercal platform.

Supercal Conversational (AI Meeting Scheduling System):

- Worked on Developing Supercal Conversational, an AI-powered meeting scheduling system that enables users to schedule meetings directly through email threads.
- Worked on designing a pure agentic workflow using LangChain and prompt engineering, allowing AI models (ChatGPT / Claude) to process human inputs from email conversations.
- Worked on enabling automated back-and-forth communication among meeting participants via email to determine optimal meeting times.
- Integrated the conversational scheduling system with the Supercal Core scheduling algorithms to automatically create finalized meetings.

Project Lead – Waltly.net

March 1, 2024 – May 1, 2025

Technologies: Python (Django), PostgreSQL, AWS, Three.js

- Led development of a 2D and 3D event visualization and animation tool for Walters Wedding Estates.
- Replaced an existing third-party solution, resulting in annual cost savings of approximately \$72,000.
- Delivered the project within an accelerated timeline of 3 months.

Lead Backend Engineer – Walter's Hospitality

October 17, 2023 – January 31, 2025

Technologies: Python (Django), React, PostgreSQL, AWS, MongoDB, Google Firebase

- Led a cross-functional team consisting of 7 backend engineers, 4 QA engineers, and 1 DevOps engineer.
- Architected and developed a comprehensive CRM platform for Walters Wedding Estates and its associated businesses to centralize operational workflows and customer data.
- Developed a customer onboarding portal to streamline the customer journey and automate multiple operational processes.
- Reduced new customer onboarding time from 2 days to 15 minutes through system automation and improved workflows.

Major Modules Delivered:

- Lead generation and lead management
- Proposal generation, contract management, and digital signing for event booking
- Communication portal between the customer application and the CRM system
- Vendor management systems for: Bakery vendors, Flower vendors, Photography vendors, Wedding dress vendors, Wedding venues, Catering vendors

Throughout his stay at Arbisoft, we found him a polite, technically sound, diligent and hardworking team member. We wish him all the success in his future endeavors.

Regards,

Ayesha Mahmood
Head - People Operations & Development
