May 15, 2023 – October 16, 2023

Technologies: Python (Django), React, PostgreSQL, AWS, MongoDB, Google Firebase

- Led a cross-functional team consisting of 7 backend engineers, 4 QA engineers, and 1 DevOps engineer.
- Architected and developed a comprehensive CRM platform for Walters Wedding Estates and its associated businesses to centralize operational workflows and customer data.
- Developed a customer onboarding portal to streamline the customer journey and automate multiple operational processes.
- Reduced new customer onboarding time from 2 days to 15 minutes through system automation and improved workflows.

Major Modules Delivered:

- Lead generation and lead management
- Proposal generation, contract management, and digital signing for event bookings
- Communication portal between the customer application and the CRM system
- Vendor management systems for: Bakery vendors, Flower vendors, Photography vendors, Wedding dress vendors, Wedding venues, Catering vendors

Product Lead & Software Engineer – Qoutely (formerly Market-in)

June 14, 2022 – May 15, 2023

Technologies: Business Analytics, Product Strategy, Project Management

- Led product development and business strategy planning for the Market-in initiative.
- Conducted focus groups, vendor interviews, and surveys to collect insights and perform both qualitative and quantitative analysis.
- Designed high-fidelity product prototypes and conducted user testing sessions to validate the product direction.
- Presented the complete business plan and product strategy to investors and company leadership.

Software Engineer – Edly.io

June 14, 2021 – May 15, 2023

Technologies: Python (Django), React, PostgreSQL, AWS, Open edX

- Designed and developed multiple features within the Open edX ecosystem, improving learning experiences for both instructors and learners across LMS, Studio, Ecommerce, and Discovery platforms.
- Built Edly Analytics features to help users gain deeper insights into their learning activities and performance.
- Implemented application-wide translations and localization using Transifex and Django internationalization frameworks.

Throughout his stay at Arbisoft, we found him polite, technically sound, diligent and hardworking team member. We wish him all the success in his future endeavors.

Ayesha Mahmood
Head - People Operations & Development
